

IoT Readiness Services

Leveraging Big Data for Increased Competiveness

CAPITALIZING ON NEW OPPORTUNITIES

The Internet of Things (IoT) – billions of devices connected and communicating with each other and other businesses – promises dramatic enhancements in efficiency, new products, and business models. There's something in IoT for everyone, with many ways to apply IoT technology to create new offerings and enhance decision making.

IoT must be underpinned by reliable, secure network connectivity that supports both legacy and new infrastructure including cellular, wired and Wi-Fi networks. Acuative is the partner you need to help you turn the potential of IoT into positive business outcomes by ensuring that your infrastructure is ready for the new demands.

CRITICAL CONSIDERATIONS

Are your technology strategies fully aligned with your business strategy? What network bandwidth is needed? How will you manage all those connected devices? Can you scale in a secure manner? Acuative can help address these questions, and more, to fully support your IoT initiative and make you successful.

THE ACUATIVE SOLUTION

- Assessment of your current infrastructure and alignment of your technology with your IoT goals
- Design and engineering for the future state of your infrastructure including reference architecture, strategic roadmaps, network design and optimization
- Infrastructure procurement, inventory management, staging and pre-deployment configurations
- Fast, effective implementation for hardware and cabling and on-site maintenance by our own certified Field Service Engineers
- IoT Management featuring 24/7 proactive monitoring and remote support to detect and manage issues

Turn the potential of IoT into positive business outcomes by ensuring that your infrastructure is ready for the new demands.

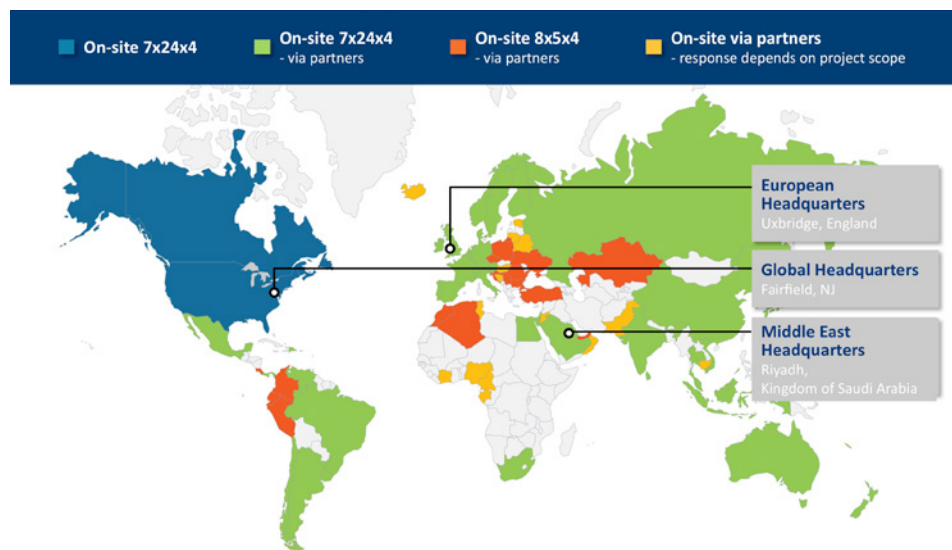

EXPERTISE YOU CAN COUNT ON.

Acuative's highly skilled teams deliver reliable solutions featuring innovative, proven technologies for network infrastructure WAN/LAN, IoT, IPT/unified communications, security, mobility/wireless, data center, storage, and interactive kiosk/digital signage needs. Utilizing our certifications and following industry best practices from ITIL®, PMI®, BICSI®, and our own quality program, Achieving Service Excellence (ASE), we plan and execute to the highest standards.

INNOVATIVE. RELIABLE. SCALABLE.

Acuative enables companies to maximize their IT potential and market opportunities. We act as our clients' consistent, single source partner who provides reliable support while remaining flexible enough to move quickly and effectively. We start by understanding your technology and business goals and develop and execute strategies to ensure the right resources and services, when and where you need them worldwide.

GLOBAL SERVICE COVERAGE

WHY CHOOSE ACUATIVE?

- Extensive IT and network experience
- Comprehensive planning and implementation systems
- Global support capabilities
- 24/7/365 Global Technology Center
- Service Level Agreements
