Structured Network Cabling

Information Transport Systems for All of Your Locations

Acuative provides the information transport systems expertise you need for complete voice, data and video structured network cabling design, installation and testing, and more. Now you count on a single source to help ensure your physical layer infrastructure supports your network and ultimately, your business goals.

First, we understand your network requirements and develop a plan including recommendations for cable type and performance. Next, following ANSI/ EIA/TIA standards, code requirements and fire regulations, we complete the installation using our own engineers. Finally, we provide cable management, testing, documentation and warranty to complete the solution.
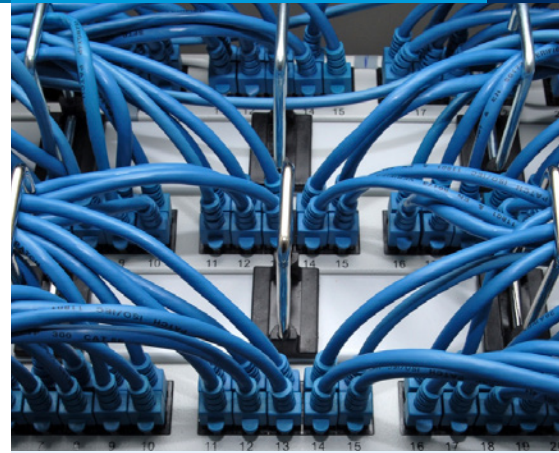

Our field service engineers have met rigorous requirements to earn certifications for the design and installation of ITS to industry standards.

Services

- Structured network cabling for voice, data, video
- Services for both existing site renovation and new construction
- Planning and design for physical layer including consulting, project management and cabling standards development

Experience in the Field

Available. Reliable. Professional. Customer focused. Employees of Acuative, not outside contractors. Strategically located nationwide, our electronically dispatched Field Service Engineers are fully equipped to perform installation and maintenance services including troubleshooting, circuit testing, in-field configuration, and structured network cabling. For ongoing support and communication in the field, they have access to the extensive certified resources of the 24/7 Acuative Network Management Center.

Flexible Financial Arrangements for Lower Operating Costs

Firm, fixed pricing allows confident budgeting. Guaranteed cost structure ensures no hidden costs – no surprises. Leasing and rental plans are available.

Commitment to Quality

Our commitment to excellence is exhibited every day through our companywide quality system, Achieving Service Excellence (ASE). Similar in depth and scope to iSO and Six Sigma, ASE focuses on customer-driven metrics and enables Acuative to provide the highest level of quality services and value to our clients.

ITS Certifications

- BICSI Certified ITS- Registered Communications Distribution Designer (RCDD)
- Unique Firestop Products
- Hubbell Certified Installer – Mission Critical® Warranty and System Performance Guarantee Program
- National Fire Protection Associationr

A Boost to Your Bottom Line

Choose Acuative for complete network management resources without the expenseof building your own. Cost-effective programs give you access to application engineers, warehousing, field service engineers, dispatchers, coordinators, field support teams, call center staff, information systems personnel, and more, to help you reach your networking and business goals.
